ABOUT

24. Maker. Atrocious gamer.

Shiny new tech? Yes please.

CSS-in-JS? No thanks.

TypeScript everything? Y-E-S.

I build for better developer experiences.

TECH

TypeScript

SCSS

React

Electron

Redux / MobX

Mocha / Jest

Apollo / GraphQL

EXPERIENCE

Perdoo

2018 - Present
Berlin, Germany

I was brought on to maintain the internal UI library. I added Storybook to the stack, and set up an automated testing framework with Jest & Enzyme. I also focused on developer experience for the web product, which led to a cleaner, more consistent codebase, crushing reported bugs by 50%.

React, Redux, Enzyme, Jest, React Native

Postman

2016 - 2018
Bangalore, India

I joined as a third to the team responsible for building the Electron app. I wrote the currently live version of the Runner, and rewrote parts of the data model to support workspaces. I also worked on an internal framework for IPC within the app.

React, Redux, MobX, Electron

PROJECTS

Lifetime

2019
[Source on GitHub](#)

A weekend project birthed out of boredom, it is a macOS app that sits on the tray and displays how much of the day/week/month/year and your lifetime has passed.

TypeScript, Electron

Frontline

2018
[Source on GitHub](#)

A bot that watches Rocket League Twitch streams, and broadcasts to a server when an interesting event, such as a goal, or a save, occurs on stream. The project was designed to automate esports journalism.

TensorFlow, OpenCV, NodeJS, React, MobX, React Native

Luncheon

2018
[Source on GitHub](#)

I built this for the NodeKnockout hackathon. The app lets you schedule a meal with up to 2 strangers nearby. It shares its premise with Tinder, but is designed for acquaintances.

Next.js, React, MobX, NodeJS, MongoDB, React Native
